

Mohamed Abdelkhalek (Mohamed Taha)

As-salamu alaykum dear brothers and sisters,

At my core, I am from a Muslim country who had strong work ethics instilled into me at a very young age. My initiative and desire for helping others and the community succeed are what have guided my success in my professional career.

I'm a father of three, working for ABBVIE as a Global Training Lead and strategic partner where I oversee the strategic direction and leadership of training programs supporting our global strategies

VISION

IFN is a home for all community groups leading the way to a successful future for all Muslim brothers and sisters by engaging our youth, creating a unity between all, and building the new IFN Facility for the future.

Key Priorities

Build for the Future : Bring **Youth programs** into live by creating more interactive engaging approaches that target all community groups.

Facility Expansion: Work with the BOT in their efforts to secure the necessary fund to start the construction in 2022 and afterward bringing **fresh ideas** and **solutions** on how we can secure the funds from inside and outside the community.

Inclusion: Re-establish **community unity** with no exclusion to any group, IFN should be a home for all members regardless of who they are! It is critical that we create the **right culture** through listening, engaging, and supporting the community with more development and social programs to build the unity between the IFN community members.

Re-ignite our creativity and best utilize all digital solutions and outreach programs: to support **youth, community engagement** as well as **fundraising activities** where we can expand our target groups beyond our community members using many multichannel outreach programs and digital solutions.
